- II. Claims 10 - 20, drawn to a method for contouring a workpiece for the manufacture of an automotive instrument panel support beam, classified in class 72, subclass 370.24.
- III. Claim 21, drawn to a method for contouring a workpiece for an article of manufacture, classified in class 72, subclass 370.26.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the
